PROFESSIONAL SUMMARY

React & React Native Developer with 1+ year building production web and mobile applications. Delivered healthcare platform serving 1,200+ doctors across 30+ specialties and quick commerce super app with real-time location tracking. Proven expertise in cross-platform development, WebSockets, REST APIs, and building scalable mobile-first solutions.

TECHNICAL SKILLS

Frontend/Mobile: React.js, React Native, Redux Toolkit, TypeScript, JavaScript (ES6+), Tailwind CSS

Backend: Node.js, Express.js, REST APIs, WebSockets, JWT Authentication, OAuth 2.0

Databases: MongoDB, PostgreSQL, Mongoose ODM

Tools & Platforms: Git, GitHub, Postman, Vitest, Docker, AWS, Google Maps SDK, Firebase Cloud Messaging

Additional: Spring Boot, Hibernate, JPA

PROFESSIONAL EXPERIENCE

React Native Developer (Intern) | Dodash | Hyderabad | Oct 2025 – Dec 2025

Quick Commerce Super App (Groceries, Food Delivery, Ride Services)

- Developed cross-platform mobile and web features using React Native, React.js, Express.js, and MongoDB for multi-service commerce application
- Engineered real-time driver location tracking system using Google Maps SDK and WebSockets, broadcasting position updates every 2 seconds with synchronized accuracy across mobile and web platforms
- Eliminated 100% of camera crashes on specific devices by diagnosing RAM exhaustion issue and migrating from default camera to react-native-vision-camera library, improving app stability for affected user segment
- Resolved critical month-long Freshchat SDK integration failure by identifying and fixing handshake authentication issue, restoring customer support chat functionality
- Implemented Firebase Cloud Messaging push notification system with device token management and deep linking architecture for real-time order status updates

Software Developer (Intern) | Hiscope Enterprises | Hyderabad | Sept 2024 – Oct 2025

VHC Healthcare Verification Platform

- Built healthcare verification platform serving 1,200+ registered doctors across 30+ medical specialties using React.js, React Native, Spring Boot, and PostgreSQL
- Architected multi-filter doctor search with 8 concurrent parameters maintaining sub-500ms query response times on datasets exceeding 10,000 records
- Developed 40+ reusable UI components with TypeScript and Tailwind CSS for authentication flows, QR-based verification, and appointment booking system
- Established Vitest unit testing framework covering 11+ critical components, increasing code coverage and reducing production regression bugs

- Collaborated in 4-member Agile development team across 12 two-week sprints with daily standups and peer code reviews, delivering 95% of planned features on schedule

KEY PROJECTS

TEJAS – AI-Powered Job Application Tracker | [Live Demo](#)

Tech Stack: React 19, TypeScript, Node.js, Express.js, MongoDB, Gmail API, OAuth 2.0, Natural Language Processing

- Built intelligent job application tracker that auto-parses 200+ emails using Gmail API and NLP algorithms, achieving 89% classification accuracy and eliminating 10+ hours weekly of manual data entry
- Engineered OAuth 2.0 authentication flow with automated cron job system and interactive visual dashboard for real-time application status monitoring

Connexa – Real-Time Messaging Platform with Geospatial Friend Tracking | [Live Demo](#)

Tech Stack: React Native, React.js, WebSockets, Express.js, Google Maps SDK, MongoDB, Redux Toolkit

- Developed cross-platform messaging application with one-on-one chat, group threads, and real-time location tracking capabilities
- Implemented WebSocket-based architecture for instant message delivery and location updates, achieving 95% code reusability between mobile and web platforms

Quick Text – Instant Cross-Device Text Sync | [Live Demo](#)

Tech Stack: React.js, TypeScript, Express.js, REST APIs, QR Code Authentication, Vite

- Created text-sharing tool with Express.js backend enabling multi-device synchronization with sub-200ms cross-device access latency
- Built QR-based secure device linking system supporting 5+ simultaneous active connections per session

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering

Bharat Institute of Engineering and Technology | Hyderabad, India | 2021 – 2025

CERTIFICATIONS

- Java Foundations – Oracle Certified (Exam 1Z0-811) | Sept 2023
- Supervised Machine Learning – Coursera (Stanford University) | 2024
